## WE ASSUME RESPONSIBILITY CERTIFICATION AS CO<sup>2</sup> NEUTRAL COMPANY

A company bears responsibility for many things: responsibility for employees, customers and suppliers, but above all, for society in general. In the “old world” it would have been summarized with the words development and stability. Nowadays, the values have changed and companies have to face new challenges beside that. Agility and sustainability are big tasks that companies are dealing with. We understand, that we have to face these difficult issues and have certified ourselves as a CO<sup>2</sup> neutral company!

### WHY WE DO THAT?

Climate change is the biggest challenge for humanity since the end of the Ice Age. There is now a global consensus that we urgently need to limit this human-made climate change. The success of emission reductions essentially depends on the voluntary and consistent action of the economy in the industrialized countries. We are ready to take responsibility for the world that we leave to our children and grandchildren.

Greenhouse gases are evenly distributed in the atmosphere. It therefore makes sense to avoid emissions where the costs are lowest. In addition, projects in developing and emerging countries contribute to the improvement of the economic, social and ecological situation and support the realization of the United Nations Sustainable Development Goals. For emerging and developing countries, emissions trading is a key driver for the transfer of clean technologies and sustainable economic development.

For this reason, we have collected greenhouse gas emissions from our company and our services, and offset them by acquiring a total of 400 carbon credits for 2019 and 2020. With these certificates, we support a sustainable forestry project in Uruguay, certified by the Verified Carbon Standard.

## URKUNDE

### CARL STAHL KROMER GMBH

hat die **CO2-EMISSIONEN** für das Unternehmen für  
**2019-2020** durch den Kauf von **400 ZERTIFIKATEN** aus dem  
Projekt "VCS Wald Uruguay"  
ausgeglichen.
